

LIFE OF A PIMPLE

Complexions Are Cleared and Pimples Disappear Overnight Without Trouble.

The dispensers of posam, a new skin recovery, ask that notice be given that no one is urged to purchase it without first obtaining an experimental package. Everyone who has tried it knows that the fifty-cent box, on sale at Jennie Hamilton's Pharmacy and all drug stores, is sufficient to cure the worst cases of eczema, where the surface is cracked and itchy. The itching ceases on first application. It will also cure acne, tetter, blotches, scaly scalp, hives, barbers' and every other form of itchy, including itching feet. Being flesh-colored and containing no grease, the presence of posam on exposed surfaces, such as the face and hands, is not perceptible. Water and soap cannot be used in connection with it, as these irritate and prolong skin troubles, sometimes even causing them. As to the experimental package of posam, it can be had free of charge by mail of the Emergency Laboratories, 22 West Twenty-Fifth Street, New York. It alone is sufficient to clear the complexion overnight, and to rid the face of pimples in twenty-four hours.

The Masonic Fete—Food Sale—Vital Statistics—Miss Lovell—The Sillick Residence—Capt. Wakelee and the Fish—Personal.

Over 500 tickets were sold for the Masonic law festival, which was held in Stratford avenue, and Beardsley's lane. This netted \$75 and much more was received from the sale of cake and cream. But for the fine weather and aspect of the weather many more would have been in attendance. Mrs. Clinton, Mrs. Curtis, Miss Dana, and other ladies helped to wait on the tables. The grounds were illuminated with flags of all nations, while large palm trees were added to the attractions of the place. During the course of the evening the local mandolin club gave a number of selections, and there were also recitations.

Town Clerk Stage said yesterday that in all his experience this is the largest record of infant mortality in so short a time he has ever known.

The statement is now made that the School Board, after going over the Sillick residence with a possible view to buying the place, has concluded that the house could not easily be turned into a school house, and so the proposition to acquire the property has been abandoned.

WOODPECKERS ATTACK TELEPHONE, TELEGRAPH AND ELECTRIC LIGHT POLES.

Considerable damage is being done to telephone, telegraph and electric light poles by members of the woodpecker family. These birds originally built their homes in the dead or dying trunks or limbs of trees, but for some reason best known to themselves, have come to the conclusion that the peeled poles offers better conditions for a home.

They have become so ravenous of late that their depredations are attracting considerable attention among those who are compelled to use quantities of wooden poles. Their activities spread over a wide portion of the United States, notably in the South, Southwest and Central West. Cedar poles seem to be the ones most frequently attacked. The birds bore into them at any height from the ground and the holes which they make are often two or three inches in diameter and four or five inches deep. Such an amount of wood drilled from a stick of timber which is carrying a load of wires naturally weakens the strength of the line.

It would, of course, not be a difficult matter to exterminate these birds. However, this is not desirable, as they are among the most beneficial forms of bird life native to this country, because they destroy large numbers of insects which seriously damage forest and food crops. It seems, therefore, that methods should be undertaken to compel the birds to revert to their former habit of boring rather than to exterminate them.

Frequent inquiries have been made by the Forest Service in this connection, but the only information to date which the Government has been able to obtain is that on a casual inspection of treated and untreated poles lines in Louisiana. In that region it was found that the untreated poles were impregnated with creosote oil were not attacked by the birds, whereas untreated poles under the same conditions were very severely injured.

Whether or not creosote will prevent such an attack is not definitely known, but the Service is investigating this question of taking down the old trees in town is being agitated. The proper thing to do is to agitate the trees until they come down.
